Riassunto. È evidenziata l'importanza della collezione di Curculionoidea di Piero Abbazzi, composta principalmente di esemplari italiani e conservata nel Museo "La Specola" di Firenze. Viene fornita la lista dei taxa in essa presenti e del materiale tipico in essa inclusa.

Abstract. *The Piero Abbazzi Curculionoidea collection and its importance (Coleoptera).* It is pointed out the value of the Piero Abbazzi collection of Curculionoidea, composed of mainly Italian specimens and preserved in the Museum "La Specola" of Florence, Italy. A list of the taxa represented, and of typical material included in the collection is also given.

Piero Abbazzi, appassionato ed infaticabile raccoglitore di coleotteri curculionoidei, ci ha lasciato, oltre ad un ricordo indelebile della sua affabilità, generosità e disponibilità di cui si parla in altra sede, anche una preziosa collezione di coleotteri quasi esclusivamente italiani della superfamiglia Curculionoidea Latreille, 1802 ora conservata nel Museo "La Specola" di Firenze.

Frutto di tanti anni di accurate ricerche sul campo, condotte principalmente in Italia centrale, area del nostro paese a tutt'oggi ancora relativamente poco conosciuta, detta collezione rappresenta una inestimabile testimonianza della ricchezza faunistica, ormai ahimè molto depauperata, del nostro territorio.

Essa si compone di 67 scatole di grande formato contenenti moltissimi esemplari di curculionoidei accuratamente preparati e determinati sia da Piero che da altri entomologi specialisti di alcuni difficili gruppi. Si può quindi dire che la collezione Abbazzi integra, completandole in modo sostanziale, le raccolte di insetti di questa superfamiglia sia storiche che recenti già presenti nel museo.

L'idea di pubblicare un catalogo aggiornato dei curculionoidei italiani, nel quale venisse riportata anche la distribuzione per regioni che sostituisse quello sì prezioso ma ormai piuttosto datato di PORTA (1932) e successivi aggiornamenti (PORTA 1934, 1949, 1959), venne a Piero già alla metà degli anni ottanta del secolo scorso. Dopo un lungo lavoro di rifinitura e controllo dei dati, questo catalogo (ABBAZZI & OSELLA 1993) venne pubblicato in collaborazione con il compianto Giuseppe Osella, allora il massimo specialista di questa grande superfamiglia di coleotteri, il quale aiutò Piero soprattutto con i dati provenienti dalla sua imponente bibliografia (ABBAZZI et al., 1993).

Intanto Piero continuava ad arricchire la sua collezione, attraverso sia raccolte dirette che con scambi di materiale e di informazioni con altri entomologi. Tutto ciò gli permise di pubblicare l'ultimo e più recente catalogo delle specie di Curculionoidea italiani (ABBAZZI & MAGGINI, 2009), principalmente basato sui dati della sua raccolta. Questo catalogo venne poi completato da un aggiornamento ancora più recente (ABBAZZI & ZINETTI, 2013), pubblicato quando ormai Piero raramente poteva per ragioni di età e di salute raccogliere direttamente.

Piero aveva disposto che alla sua morte la sua collezione venisse inclusa in quelle del museo "La Specola" della sua Firenze. Essa comprende un gran numero di specie e sottospecie di curculionoidei,

tra i quali non sono rappresentati Anthribidae Billberg, 1820, Brentidae Billberg, 1820, Scolytidae Latreille, 1804 e Platypodidae Shuckard, 1840 perché tutti gli esemplari di queste famiglie già da alcuni anni erano stati generosamente donati da Piero al detto museo. Nella presente nota le famiglie dei Curculionioidea sono quelle elencate in ALONSO-ZARAZAGA & LYAL (1999) che sembrano rispondere di più a concetti di sistematica, piuttosto che quelle riconosciute da LESCHEN & BEUTEL (2014) che danno maggiore importanza a ricostruzioni filogenetiche basate più spesso su mancanza che su ricchezza di dati, e che lasciano quindi ampi margini di incertezza sia sulle reali affinità che sull'ordine sistematico dei curculionioidei, ma che purtuttavia sono state acriticamente adottate dal recente catalogo dei Curculionioidea paleartici (ALONSO-ZARAZAGA et al., 2017). A livello generico e specifico la nomenclatura dei taxa sotto elencati è quella riportata nel detto catalogo.

Passando al dettaglio, il numero di curculionioidei presenti nella collezione Abbazzi è di 1.364 specie, così suddivise:

- 2 specie di Cimberididae Gozis, 1882;
- 1 specie di Nemonychidae Bedel, 1882;
- 3 specie di Attelabidae Billberg, 1820;
- 34 specie di Rhynchitidae Gistel, 1848;
- 164 specie di Apionidae Schoenherr, 1823;
- 18 specie di Nanophyidae Gistel, 1848;
- 10 specie di Dryophthoridae Schoenherr, 1825;
- 9 specie di Brachyceridae Billberg, 1820;
- 16 specie di Raymondionymidae Reitter, 1913;
- 1386 specie di Curculionidae Latreille, 1802.

L'elenco completo dei taxa rappresentati nella collezione Abbazzi è riportato di seguito. Tra di essi è presente materiale tipico, elencato in ordine alfabetico, dei seguenti 74 taxa: *Alaocyba magrinii* Fancello & Leo, 2013; *Amaurorhinus caoduroi* Osella & Pogliano Osella, 1986; *Amaurorhinus mediterraneus* Folwaczny, 1972; *Amaurorhinus sardous* Folwaczny, 1972; *Archarius ziliolii* Diotti & Caldara, 2013; *Baldorhynchus brixianensis* (Osella, 1983); *Brachiodontus pseudoalpinus* Osella & Cornacchia, 1974 [= *B. alpinus* (Hampe, 1867)]; *Ceutorhynchus alliaticola* Colonnelli, 1987; *Ceutorhynchus caietani* Colonnelli, 1992; *Ceutorhynchus declivis* Colonnelli, 1988; *Ceutorhynchus magnanoi* Colonnelli, 2011; *Ceutorhynchus nanooides* Colonnelli, 1987; *Ceutorhynchus verticalis* Colonnelli, 1992; *Cirrorhynchus sclanoi* Abbazzi & Magnano, 1993; *Cotaster kostali* Diotti, Pesarini & Caldara, 2015; *Dodomeira ibleiensis* Bellò & Baviera, 2017; *Dodomeira paladini* Bellò & Baviera, 2017; *Dolichomeira caralitana* Pierotti & Bellò, 2000; *Dolichomeira caroli* Pierotti & Bellò, 2000; *Dolichomeira circumcincta* Pierotti & Bellò, 2000; *Dolichomeira francisci* Pierotti & Bellò, 2000; *Dolichomeira ichnusae* Pierotti & Bellò, 2000; *Dolichomeira jana* Pierotti & Bellò, 2000; *Dolichomeira marci* Pierotti & Bellò, 2000; *Dolichomeira melonii* Pierotti & Bellò, 2000; *Dolichomeira marcosellai* Pierotti & Bellò, 2000; *Dolichomeira nuragica* Pierotti & Bellò, 2000; *Dolichomeira occidentalis* Pierotti & Bellò, 2000; *Dolichomeira olearia* Pierotti & Bellò, 2000; *Dolichomeira oppidana* Pierotti & Bellò, 2000; *Dolichomeira plumbariae* Pierotti & Bellò, 2000; *Dolichomeira scodinai* Pierotti & Bellò, 2000; *Echinodera ibleiensis* Stüben, 2003; *Echinodera siciliensis* Stüben, 2003; *Heteromeira pacei* Bellò & Pierotti, 1992; *Leiosoma colonnellii* Pedroni, 2012; *Leiosoma dardagnense* Pedroni, 2012; *Leiosoma fiscellense* Pedroni, 2012; *Leiosoma hernicum* Pedroni, 2012; *Leiosoma talamellii* Pedroni, 2010; *Meira etrusca* Pierotti, 2012; *Mesagroicus amicalis* Magnano, Osella & Abbazzi, 2008; *Otiorhynchus (Acunotus) abbazzii* Magnano, 1996; *Otiorhynchus (Acunotus) pseudoligneoides* Magnano, 1996; *Otiorhynchus (Aranihus) venarum* Colonnelli & Casalini, 2014; *Otiorhynchus (Arammichnus) tuscoinsularis* Magnano, 1992; *Otiorhynchus (Italorrhynchus) avoni* Magrini, Bastianini & Abbazzi, 2008; *Otiorhynchus (Italorrhynchus) bartolozzii* Magrini, Meoli, Cirocchi & Abbazzi, 2004; *Otiorhynchus (Italorrhynchus) cirocchii* Osella & Abbazzi, 1985; *Otiorhynchus (Italorrhynchus) consortii* Magrini, Abbazzi & Cirocchi, 2002; *Otiorhynchus (Italorrhynchus) emmanuelae* Magrini, Meoli & Abbazzi, 2005; *Otiorhynchus (Italorrhynchus) magrinii* Osella, 1979; *Otiorhynchus (Italorrhynchus) taitii* Abbazzi, Bartolozzi & Osella, 1992; *Otiorhynchus (Italorrhynchus) virginiae* Magrini, Abbazzi &

Cirocchi, 2002; *Otiorhynchus (Otiorhynchus) aequus* Casalini & Magnano, 2005; *Otiorhynchus (Otiorhynchus) angelae* Magrini, Abbazzi, Magnano & Baviera, 2007; *Otiorhynchus (Otiorhynchus) latinus* Casalini & Magnano, 2005; *Otiorhynchus (Otiorhynchus) praenestinus* Casalini & Magnano, 2005; *Otiorhynchus (Otiorhynchus) ruffoi* Magnano, 1969; *Otiorhynchus (Parameira) pisidicus* (Magnano, 2003); *Paroxyonyx gobbii* Colonnelli, 1977; *Polydrusus bartolii* Pesarini, 1975; *Polydrusus lucianae* Francia, 1986; *Pselactus caoduroi* Osella, 1986; *Pseudomeira abbazzii* Pierotti & Forbicioni, 2015; *Pseudomeira aeolica* Bellò, Pesarini & Pierotti, 1997; *Pseudomeira alonsoi* Pierotti & Bellò, 1994; *Pseudomeira apula* Pierotti & Bellò, 1992; *Pseudomeira lucana* Bellò & Pierotti, 1992; *Pseudomeira meles* Bellò & Pierotti, 1992; *Pseudomeira obscurella* Bellò & Pierotti, 1994 [= *P. obscura* (A. Solari & F. Solari, 1907)]; *Pseudomeira pseudobscura* Bellò & Pierotti, 1992; *Ptochus anatolicus* Osella, 1977; *Torneuma abbazzii* Stüben, 2007; *Torneuma curtulum vastum* Stüben, 2007; *Torneuma liguricum* Stüben, 2007; *Tropiphorus imperator* Pesarini, 1995.

Elenco completo dei taxa rappresentati nella collezione Abbazzi

Cimberididae Gozis, 1882

Cimberis attelaboides (Fabricius, 1787)

Doydirhynchus austriacus (Olivier, 1807)

Nemonychidae Bedel, 1882

Nemonyx lepturoides (Fabricius, 1801)

Attelabidae Billberg, 1820

Apoderus coryli (Linnaeus, 1758)

Compsapoderus erythropterus (Gmelin, 1790)

Attelabus nitens (Scopoli, 1763)

Rhynchitidae Gistel, 1848

Aletinus maculipennis (Jacquelin du Val, 1854)

Mecorhis aethiops (Bach, 1854)

Aulet tubicen Schoenherr, 1826

Mecorhis ungarica (Herbst, 1783)

Auletobius sanguisorbae (Schrank, 1798)

Mesauletobius pubescens (Kiesenwetter, 1852)

Byctiscus betulae (Linnaeus, 1758)

Neocoenorrhinus abeillei (Desbrochers des Loges, 1869)

Byctiscus populi (Linnaeus, 1758)

Neocoenorrhinus germanicus (Herbst, 1797)

Caenorhinus megacephalus (Germar, 1823)

Neocoenorrhinus interpunctatus (Stephens, 1831)

Chonostropheus seminiger (Reitter, 1881)

Neocoenorrhinus minutus (Herbst, 1797)

Chonostropheus tristis (Fabricius, 1794)

Neocoenorrhinus pauxillus (Germar, 1823)

Deporaus betulae (Linnaeus, 1758)

Rhodocyrtus cribripennis (Desbrochers des Loges, 1869)

Eomesauletes politus (Lepeletier & Audinet-Serville, 1825)

Rhynchites auratus (Scopoli, 1763)

Eurostauletes rubrorufus (Solsky, 1881)

Rhynchites bacchus (Linnaeus, 1758)

Involvulus icosandriae (Scopoli, 1763)

Rhynchites giganteus Schoenherr, 1832

Involvulus pubescens (Fabricius, 1775)

Tatyanarhynchites aequatus (Linnaeus, 1767)

Lasioryhynchites caeruleocephalus (Schaller, 1783)

Temnocerus coeruleus (Fabricius, 1798)

Lasioryhynchites cavifrons (Gyllenhal, 1833)

Temnocerus longiceps (C. G. Thomson, 1888)

Lasioryhynchites comatus (Gyllenhal, 1833)

Temnocerus nanus (Paykull, 1792)

Lasioryhynchites praeustus (Boheman, 1845)

Lasioryhynchites sericeus (Herbst, 1797)

Apionidae Schoenherr, 1823

- Aizobius sedi* (Germar, 1818)
Alocentron curvirostre (Gyllenhal, 1833)
Apion cruentatum Walton, 1844
Apion dellabeffae Schatzmayr, 1922
Apion frumentarium (Linnaeus, 1758)
Apion haematodes Kirby, 1808
Apion rubens Walton, 1837
Apion rubiginosum Grill, 1893
Aspidapion aeneum (Fabricius, 1775)
Aspidapion caprai Giusto, 1993
Aspidapion radiolus (Marsham, 1802)
Aspidapion soror (Rey, 1895)
Aspidapion validum (Germar, 1817)
Betulapion simile (Kirby, 1811)
Catapion burdigalense (Wencker, 1859)
Catapion corsicum (Desbrochers des Loges, 1888)
Catapion curtisii (Stephens, 1831)
Catapion jaffense (Desbrochers des Loges, 1896)
Catapion meieri (Desbrochers des Loges, 1901)
Catapion pubescens (Kirby, 1811)
Catapion seniculus (Kirby, 1808)
Catapion seriatosetosulum (Wencker, 1864)
Ceratapion armatum (Gerstaecker, 1854)
Ceratapion austriacum (Wagner, 1904)
Ceratapion basicorne (Illiger, 1807)
Ceratapion calcaratum (Wollaston, 1864)
Ceratapion carduorum (Kirby, 1808)
Ceratapion cylindricolle (Gyllenhal, 1839)
Ceratapion dalmatinum (Györfy, 1923)
Ceratapion damryi (Desbrochers des Loges, 1894)
Ceratapion gibbirostre (Gyllenhal, 1813)
Ceratapion onopordi onopordi (Kirby, 1808)
Ceratapion penetrans (Germar, 1817)
Ceratapion scalptum (Mulsant & Rey, 1859)
Cistapion cyanescens (Gyllenhal, 1833)
Cyanapion afer (Gyllenhal, 1833)
Cyanapion columbinum (Germar, 1817)
Cyanapion gyllenhalii (Kirby, 1808)
Cyanapion platalea (Germar, 1817)
Cyanapion spencii (Kirby, 1808)
Diplapion confluens (Kirby, 1808)
Diplapion detritum (Mulsant & Rey, 1859)
Diplapion stolidum (Germar, 1817)
Eutrichapion ervi (Kirby, 1808)
Eutrichapion facetum (Gyllenhal, 1839)
Eutrichapion gribodoi (Desbrochers des Loges, 1896)
Eutrichapion hydropticum (Wencker, 1864)
Eutrichapion melancholicum (Wencker, 1864)
Eutrichapion punctiger (Paykull, 1792)
Eutrichapion viciae (Paykull, 1800)
Eutrichapion vorax (Herbst, 1797)
Exapion compactum compactum (Desbrochers des Loges, 1888)
Exapion corniculatum (Germar, 1817)
Exapion difficile (Herbst, 1797)
Exapion elongatulum (Desbrochers des Loges, 1891)
Exapion formaneki (Wagner, 1929)
Exapion fuscirostre fuscirostre (Fabricius, 1775)
Exapion inexpertum (Wagner, 1906)
Exapion subparallelum (Desbrochers des Loges, 1888)
Exapion ulicis (Forster, 1771)
Helianthemapion aciculare (Germar, 1817)
Helianthemapion genuense (Osella, 1973)
Helianthemapion velatum (Gerstaecker, 1854)
Hemitrichapion filicorne (Wencker, 1864)
Hemitrichapion juniperi (Boheman, 1839)
Hemitrichapion lanigerum (Gemming, 1871)
Hemitrichapion pavidum (Germar, 1817)
Hemitrichapion rapulum (Wencker, 1864)
Hemitrichapion reflexum (Gyllenhal, 1833)
Hemitrichapion waltoni (Stephens, 1839)
Holotrichapion aethiops (Herbst, 1797)
Holotrichapion antennale (Desbrochers des Loges, 1896)
Holotrichapion gracilicolle (Gyllenhal, 1839)
Holotrichapion ononis (Kirby, 1808)
Holotrichapion pisi (Fabricius, 1801)
Holotrichapion pullum (Gyllenhal, 1833)
Holotrichapion saturnium (Normand, 1937)
Ischnopterapion aeneomicans aeneomicans (Wencker, 1864)
Ischnopterapion cognatum (Hochhuth, 1851)
Ischnopterapion fallens (Marseul, 1888)
Ischnopterapion loti (Kirby, 1808)
Ischnopterapion modestum (Germar, 1817)
Ischnopterapion virens (Herbst, 1797)
Kalcapion pallipes (Kirby, 1808)
Kalcapion semivittatum (Gyllenhal, 1833)
Lepidapion argentatum argentatum (Gerstaecker, 1854)
Malvapion malvae (Fabricius, 1775)
Melanapion minimum (Herbst, 1797)
Mesotrichapion punctirostre (Gyllenhal, 1839)
Metapion candidum (Wencker, 1864)
Omphalapion dispar (Germar, 1817)
Omphalapion hookerorum (Kirby, 1808)
Omphalapion laevigatum (Paykull, 1792)
Onychapion tamarisci (Gyllenhal, 1839)
Oryxolaemus flavifemoratus (Herbst, 1797)
Oryxolaemus scabiosus (Weise, 1889)
Osellaemus bonvouloirii (C. Brisout de Barneville, 1880)
Oxystoma cerdo (Gerstaecker, 1854)
Oxystoma cracca (Linnaeus, 1767)
Oxystoma dimidiatum (Desbrochers des Loges, 1897)
Oxystoma ochropus (Germar, 1818)
Oxystoma opeticum (Bach, 1854)
Oxystoma pomonae (Fabricius, 1798)
Oxystoma subulatum (Kirby, 1808)
Perapion affine (Kirby, 1808)
Perapion curtirostre (Germar, 1817)

Segue Apionidae

- Perapion hydrolapathi* (Marsham, 1802)
Perapion ilvense (Wagner, 1905)
Perapion marchicum (Herbst, 1797)
Perapion violaceum (Kirby, 1808)
Phrissotrichum delphinense (Hustache, 1913)
Phrissotrichum osellai (Sacco & Colonnelli, 1985)
Phrissotrichum revelieri (Perris, 1869)
Phrissotrichum tubiferum (Gyllenhal, 1833)
Pirapion immune (Kirby, 1808)
Protapion apricans (Herbst, 1797)
Protapion assimile (Kirby, 1808)
Protapion burgodionum (Schubert, 1958)
Protapion dentipes (Gerstaecker, 1854)
Protapion difforme (Germar, 1818)
Protapion dissimile (Germar, 1817)
Protapion filirostre (Kirby, 1808)
Protapion fulvipes (Geoffroy in Fourcroy, 1785)
Protapion gracilipes (Dietrich, 1857)
Protapion interjectum interjectum Desbrochers des Loges, 1895)
Protapion laevicolle (Kirby, 1811)
Protapion nigricrus (Desbrochers des Loges, 1895)
Protapion nigrirtarse (Kirby, 1808)
Protapion ononidis (Gyllenhal, 1827)
Protapion schoenherri (Boheman, 1839)
Protapion trifolii (Linnaeus, 1768)
Protapion varipes (Germar, 1817)
Protopirapion atratulum (Germar, 1817)
Protopirapion kraatzii (Wencker, 1859)
Pseudapion fulvirostre (Gyllenhal, 1833)
Pseudapion moschatae (A. Hoffmann, 1938)
Pseudapion rufirostre (Fabricius, 1775)
Pseudaplemonus artemisiae (Moravitz, 1861)
Pseudaplemonus chevrolati (Gyllenhal, 1833)
Pseudaplemonus limonii (Kirby, 1808)
Pseudoperapion brevisrostre (Herbst, 1797)
Pseudoprotapion astragali (Paykull, 1800)
Pseudoprotapion elegantulum (Germar, 1818)
Pseudoprotapion ergenense (Becker, 1864)
Pseudostenapion simum (Germar, 1817)
Rhopalapion longirostre (Olivier, 1807)
Squamapion atomarium (Kirby, 1808)
Squamapion cineraceum (Wencker, 1864)
Squamapion elongatum (Germar, 1817)
Squamapion flavimanum (Gyllenhal, 1833)
Squamapion leucophaeatum (Wencker, 1864)
Squamapion minutissimum (Rosenhauer, 1856)
Squamapion oblivium (Schilsky, 1902)
Squamapion samarense (Faust, 1891)
Squamapion vicinum (Kirby, 1808)
Stenopterapion intermedium (Eppelsheim, 1875)
Stenopterapion melioli (Kirby, 1808)
Stenopterapion tenue (Kirby, 1808)
Synapion ebeninum (Kirby, 1808)
Synapion falzonii (Schatzmayr, 1922)
Taeniapion rufescens (Gyllenhal, 1833)
Taeniapion rufulum (Wencker, 1864)
Taeniapion urticarium (Herbst, 1784)
Trichopterapion holosericeum (Gyllenhal, 1833)

Nanophyidae Gistel, 1848

- Allomalialia quadrivirgata* (A. Costa, 1863)
Corimalia pallida (Olivier, 1807)
Corimalia postica (Gyllenhal, 1838)
Corimalia tamarisci (Gyllenhal, 1838)
Ctenomeropsis nigra (Waltl, 1835)
Dieckmanniellus chevrieri (Boheman, 1845)
Dieckmanniellus gracilis (L. Redtenbacher, 1847)
Dieckmanniellus nitidulus (Gyllenhal, 1838)
Hypophyes pallidulus (Gravenhorst, 1807)
Microon sahlbergi (C. R. Sahlberg, 1835)
Nanodiscus transversus (Aubé, 1850)
Nanomimus anulatus (Aragona, 1830)
Nanomimus hemisphaericus (Olivier, 1807)
Nanophyes brevis brevis Boheman, 1845
Nanophyes brevis fallax Rey, 1893
Nanophyes globiformis Kiesenwetter, 1864
Nanophyes marmoratus marmoratus (Goeze, 1777)
Nanophyes rubricrus Rosenhauer, 1856

Dryophthoridae Schoenherr, 1825

- Dryophthorus corticalis* (Paykull, 1792)
Rhynchophorus ferrugineus (Olivier, 1791)
Sitophilus granarius (Linnaeus, 1758)
Sitophilus oryzae ([Linnaeus] in Johannson, 1763)
Sitophilus zeamais Motschulsky, 1855
Sphenophorus abbreviatus (Fabricius, 1787)
Sphenophorus meridionalis Gyllenhal, 1838
Sphenophorus parumpunctatus Gyllenhal, 1838
Sphenophorus piceus (Pallas, 1771)
Sphenophorus striatopunctatus (Goeze, 1777)

Tychius suturatus (Perris, 1866)
Tychius thoracicus Boheman, 1843
Tychius tibialis Boheman, 1843
Tychius trivialis Boheman, 1843
Wittmerella aurosa (Boheman, 1845)
Zacladus exiguus (Olivier, 1807)
Zacladus geranii (Paykull, 1800)

L'importanza della collezione Abbazzi, composta da specie praticamente tutte italiane, si evince dal fatto che essa contiene ben 1643 taxa delle famiglie sopra elencate su un totale di circa 2200 finora noti del nostro paese, molti dei quali si conoscono però solo sui tipi e/o su pochissimi altri esemplari. In conclusione, bisogna dar credito a Piero Abbazzi di avere in modo così significativo aumentato e precisato le nostre conoscenze sui Curculionioidea italiani, e di aver lasciato con la sua collezione una imperitura testimonianza del suo lavoro e della sua passione, che è quella che anima ancora tutti noi entomologi. Grazie, Piero!

Ringraziamenti

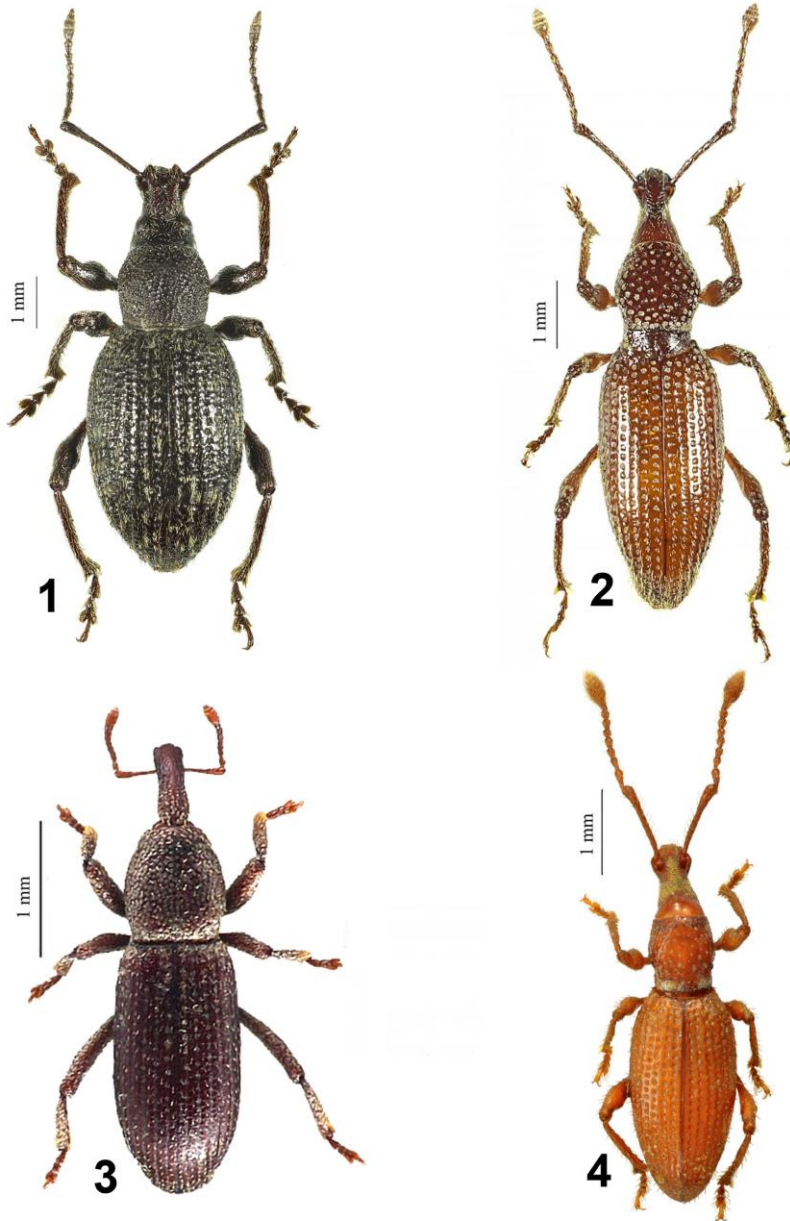

Questa nota sarebbe stata incompleta senza la collaborazione di Luca Bartolozzi e di Aligi Bandinelli i quali hanno controllato la collezione Abbazzi, fornendomi preziosi dati. Le fotografie di alcuni dei tipi presenti in essa mi sono state generosamente comunicate da Paolo Magrini, che qui sentitamente ringrazio.
